# An itinerant ski safari

IN SEARCH OF THE BEST SNOW IN THE WORLD

The island of Hokkaido enjoys every year exceptional snowfall and a snow with an extraordinary light texture, described by some as "the best snow in the world". We propose an 8-day itinerant ski safari to discover the island and its volcanoes.

Equipped with ski touring material (minimum 90 mm skate), we will alternate skiing in ski resorts and outside in the mountains. The ski lifts will help to facilitate most of the crossings, since they will allow us a faster access to the best off-piste in all types of terrains: forests, steep slopes ...

# Development of the trip

ADAPTABILITY. SNOW CONDITIONS.

Our stay has been scheduled on a base of 8 days dedicated to freeride skiing, backcountry and off-piste skiing. In search of the famous powder snow of Hokkaido, our advantage will be our ability to adapt. The accommodation will be booked a few days before our arrival in order to guarantee the best snow conditions ..

Two main areas:

**FURANO** - In the center of the island, it is the ideal base to discover amazing ski areas in a radius of one hour transport.

**NISEKO** - Located to the west of the island, it is the largest ski resort in Hokkaido, and offers 1,000 m drop. Like Furano, its strategic location allows to discover the surrounding areas..

OUR  
STRONG  
POINTS

. Duration: 7 days of skiing

. Altitude: 0 to 1.085 meters

. Slope: 400 - 1,000 meters

. Relief: forests, volcanoes .....

. Groups: maxi. 7 skiers per guide.
