

Travel insurance

On all our trips, we require that you have a full health and accident insurance.

It is important that before choosing an insurance you check:

- If the insurance really offer the insurance for the activity and location where you will make your trip and if they require you to take out an extension if the single journey goes beyond a certain duration.
- Pay attention to what is cover and also the limits.
We recommend you <https://www.assurance-multi-sports.com/>
- Then we recommend you also to contract an insurance for trip cancelation.
- In this case we recommend you <https://www.europ-assistance.fr/> or <https://www.europ-assistance.es/>

It is very important that you make this insurance when you confirm and pay the reservation of the trip with us as this is normally a must so the insurance will cover you.

You have different options depending what you want to get cover in total.

Some of our trips may end up in the category insurance companies call "expedition", as Kilimanjaro for example because of the altitude, which many do not cover. In this case we will also help you to find the correct insurance company.
